

## Are You Registered to Receive Emergency Alerts?

Did you know the City of Lebanon uses CodeRED alert system to relay important information to residents by phone?

CodeRED is a high-speed messaging system that can deliver customized emergency notification and instructions at a rate of 60,000 calls per hour. The system is primarily used to notify residents of important information, such as, utility disruptions, boil alerts, road closures, and other important community-related information. The system is not used to relay weather-related information, such as, tornado warnings, since the system does not operate as rapidly as needed. Residents should rely on weather radios, local news programming and the tornado sirens for this information.

Residential land line telephones automatically receive CodeRED messages, but you must register if you wish to receive the emergency notifications.

- You want to be notified on your cell phone
- You have an unlisted phone number
- You have moved and need to update your phone number
- You use TDD/TTY
- You want to use your work phone as a back up to your home phone

To register, visit [www.lebanonohio.gov](http://www.lebanonohio.gov) and click the CodeRED icon in the lower left side of the page. You will know the call is from CodeRED

alert system when your Caller ID displays 999-911-9999 or Emergency Comm for Emergency Notifications. If you would like to hear the last message delivered to your phone, simply dial the number back. Also, Android and iPhone users can download the free CodeRED mobile alert app to receive alerts. The app is *geo-aware*, which means you will only receive alerts that impact your *specific* location.
